IMPACT WRENCHES HIGH POWER & EXTREME DURABLITY

Industrial Tire Change

Compact more powerful and durable than the competition

CP7727 Max. torque: 250 Nm

when he said the said as

- » CP7737 Max. torque: 300 Nm
- » One hand operation, forward and reverse
- » 3 positions in forward and 1 in reverse
- » Jumbo hammer mechanism
- » Length: 240 mm
- » Weight: 1,1kg

2500p

Ultra compact 1/2" wrench, easy to use and durable

- » Steel front cover & Aluminum body
- » One hand operation forward reverse by either left or
- » right handed users
- » 3 setting positions
- » Only 4.4" long
- » Jumbo hammer

1499=

Most powerful 1/12 fool on the market in its class |

8941077480

- » 1/2" composite impact wrench
- » One handed forward/reverse
- » Full power in reverse: 1250 Nm maximum real torque in reverse
- 3 positions in forward: Low245 Nm Medium 650 Nm -

High 990 Nm

1700b

The univeled 144 impact wrench

- Rew
- » 3/4" composite impact wrench with dual retainer (hole + ring)
- » 1,950 Nm of max torque in reverse» Low air consumption at 4.8 l/s
- » Insulating and lightweight composite handle
- » S2S easy forward reverse
- » Full teasing developed trigger

4900

The streight impact wrench with Fractanded anvil

- » 2600 Nm max torque in reverse
- » Pinless closed reinforced +rocking dog impact mechanism
- » Dual socket retention, hole and friction ring
- » Ergonomic side handle
- » Length: 520 mm
- » Weight: 11,6 kg

6500_H

Champion (Ppistol Impact wrench

New

- Length = 8.1 in. / 205 mm
- » All controls within reach
- » Variable speed trigger
- One-hand power adjustment
- » One-hand reverse system
- » 1950 Nm of maximum torque
- » Composite motor housing
- » Twin hammer mechanism» 360° swivel air inlet

53000p

The most productive 142 with edimonographe rewar and engonomics

- » Extremely comfortable handle and adjustable support handle
- » Extremely low lateral vibrations for best comfort and safety
- » Working torque range forward: 815-2710 Nm
- » Maximum torque in reverse: 4880 Nm
- » Free Speed: 3500 rpm
- » 960 blows/minute
- » Length: 420 mm

44500H

Powerful, Robust & Comforteble 1-1/27 Impact for Industrial Maintenance

- » Durable twin hammer clutch with oil bath
- » Robust aluminum body & clutch housing
- » Reversible D-type side handle
- » Maximum torque in reverse: 3900 Nm
- » Free Speed: 4300 rpm
- » 850 blows/minute
- » Length: 440 mm

245307/1

Compact, robust and powerful impact for industrial maintenance applications

- » 900 blows/minute
- » Length: 222 mm
- » Weight: 5,5 and 5,6 Kg

41400

The Super Industrial 47 with renewed design

- » Operator comfort and control even at VERY high torque
- » Progressive torque thanks to the 2-Jaw clutch
- » Working torque range forward: 1220-2440 Nm
- » Maximum torque in reverse: 3790 Nm
- » Free Speed: 3500 rpm
- » 1020 blows / minute
- » Length: 360 mm

ANGLE GRINDERS INDUSTRIAL POWER AND DURABILITY

CP7550-A 8941075503

Powerful & efficient for a wide variety of applications

- » M14 spindle thread
- » High quality bevel gears & Governed motor
- » Robust steel keyless adjustable wheel rotative guard
- » 1.1HP 840 W
- » 1000 hour service interval
- » Streamline CP Safety Lever
- » Free speed: 12 000 rpm
- » Length: 270 mm

74:3(0)(0)H

Superior torque for maximal productivity

- » Industrial grade durability with up to a 2,000 hour maintenance interval
- » Superior ergonomics
- » Wheel size: 125 mm
- » Spindle thread: M14
- » Free speed: 12 000 rpm
- » Power: 1 700 W
- » Weight: 1,9 kg

CP3850-85AH7VE

Highest durability in demanding applications with up to 2,000 hours maintenance intervals

- » Low profile angle head
- » Superior durability bevel gearing
- » Double action safety lever
- » Wheel size: 180 mm
- » Spindle thread: HEX
- » Free speed: 8 500 rpm
- » Power: 2 100 W
- » Weight: 2,7 kg

ANGLE GRINDERS & SANDERS

CP3550 Series INDUSTRIAL PERFORMANCE

The CP3550 industrial angle grinders and sanders are available for use with 4", 4.5" and 5" (100, 115 and 125mm) abrasive grinding and cutting wheels as well as sanding pads. The angle die grinders are designed to be used with carbide burrs or mounted points. This new range is ideally suited for contouring, deburring, cutting, finishing and weld cleaning of different materials such as cast iron, steel, stainless steel, aluminum and composite, magnesium and titanium.

THE CP66- SERIES HIGH DURABILITY AND LOW MAINTENANCE

The most robust pneumatic nutrunner in its class

Chicago Pneumatic launches its first compact and robust pneumatic nutrunner, the CP66 series, perfect for flange-related and other bolting applications in the oil & gas, power generation, and wind energy industries. It also provides a more durable, powerful and safer alternative to an impact wrench in remanufacturing, maintenance, repair and overhaul operations within the mining, off-road and heavy-truck sectors.

Chicago Pneumatics' new CP6613 weighs as little as 9.7 lbs. (4.4 kg) with the reaction arm. Small but powerful, the CP6613 is equipped with a robust gearbox and a high performance air motor, similar to the industrial impact wrenches motors, delivering a powerful 960 ft.lbs (1300 Nm) in forward or reverse for high productivity. The max torque of CP6641 is 3100 ft.lbs (4100 Nm).

Operator comfort is an integral part of this new pneumatic nutrunner's design. This is evident in the fact that the CP66 series is recognized to have a vibration level close to zero. The torque set up is defined with the CP Air Torque Control FRL which enables extremely fine pressure adjustment.

GP6613/26/41 Sortes

Robust, accurate and lightweight

- » Replaceable protective cover
- » Reliable Gearbox: 13,000 cycles before maintenance
- » Vane type high performance air motor same as industrial impact wrench
- » Capable of reaching high torque accuracy
- » Different reaction arm types and shapes available
- » Reduce operator fatigue and risks of MSDs

INDUSTRIAL DRILLS REVERSIBLE PISTOL DRILLS

Chicago Pneumatic announces its latest addition to the industrial pistol drills range, CP1114R

Powered by a 0.5HP (410W) motor, these reversible pistol drills are perfect for drilling, tapping and reaming in industrial production and maintenance applications. Available in 4 speeds: 500, 900, 2600, and 4000 RPM the CP1114R cover a large variety of applications, from aluminum to stainless steel

The unique CP Ergo Wing design allows a comfortable and safe grip for operators while the three full caged planetary gears offer a high level of durability, with 800 hours service intervals. As a result a best in class run out (below 0.15mm) is achieved for high precision drilling and tapping.

Ergonomic and compact body

- Ergonomic & compact body
- Low noise and low vibration

EXPERTS CORNER 10 YEARS OF EXPERTISE AND PA

Getting the best torque control from your wrench

Pneumatic impact wrenches were originally meant for loosening stubborn nuts and bolts. However, nowadays mechanics use impact wrenches for tightening bolts too, for example on wheels, so they can do their job faster, with more efficiency, and increased safety. Here's some insight on torque regulation and how to make sure the tools are performing as expected.

A tool's power is dependent on the amount of air in the motor, and there are typically two methods of regulating the power with the air. The first one is by regulating the air pressure, the second is by acting on the air flow directly by either selecting the right air compressor, or by using the correct hose diameter.

Most pneumatic tools on the market are designed to run optimally on 90 PSI / 6.3 bars. Operators should use an air regulator to gauge the pressure while the tool is connected to the compressor.

A Filter Regulator Lubricator (FRL) limits the air pressure going into the tool and allows regulation of air pressure through the hose. It gives precision to power settings - to adjust the air pressure and achieve better accuracy, mechanics should use a gauge-equipped FRL. If the tool doesn't receive the air pressure recommended for that tool, then it goes without saying that the tool will not deliver what is expected from its settings.

Over the years, the design of tools has evolved to enable operators to have better control of the air flow. In the first half of the 20th Century, early, classical models had a lever on the back which was depressed to reduce the air flow inside the tool. These basic impact wrenches employed simple technology that could be used with one hand, but they were never fully precise.

Today, focus is being given to delivering the highest levels of precision combined with ergonomics. Tools are being designed to give finer air regulation, and therefore better torque control. Innovation can be found in the newest impact wrenches to help mechanics work more efficiently; for example they don't need to move the tool to moderate its power as the controlling area is on the back of the tool, with easy access.

Furthermore, specific tools have been developed to prevent overtightening of bolts - for example torque limited impact wrenches. Today's tools give mechanics better control. The tools have customized settings so the operators can choose how much torque is required.

"There is no 'one-size-fits-all' tool for every garage application, but instead, the best tool for the job depends on the mechanic's needs, habits and comfort. There is a large choice of impact wrenches available which need to be selected based on several criteria - an important one being how finely you need to control power and torque."

Yann Pasco, Global Business Development Manager - Vehicle Service
